June 2024

At its June meeting, the DOY Board of Directors voted to increase dividend rates 0.10% across all tiers. The upper tier is now earning 4.10% and reflects the DOY philosophy of returning as much net income as possible back to the members in the form of high dividend rates and low borrowing rates. Remember, these rates are for April, May, and June. For rates to increase more for July, August, and September, choose DOY for your future saving and borrowing needs.
